Dr. Hedda Sützl-Klein
European Society
for Integrative Health Research (ESIHR)
Zieglergasse 27/3/18
1070 Wien (Austria)

Dear Dr. Sützl-Klein,

we are happy to take part in the project “Alpine Heilpflanzen und Hausmittel”, giving a contribution through our specific expertise and research, dedicated mainly to the bioactivity and safety evaluation of medicinal plants for their use in health care and for their potential as source of new drugs.

In particular, the working areas of my team are the drug discovery from medicinal plants through pharmacological studies, identification of the active principles and of their mechanism of action, as well as the risk characterization of herbal drugs and the relevant products, that are in line with the goals of the proposal.

I therefore fully support the project on medicinal plants and home remedies from Alps “Alpine Heilpflanzen und Hausmittel”, being at disposal our knowledge and expertise in the achievement of the relevant objectives.

Kind regards

Prof. Aurelia Tubaro
